FOR IMMEDIATE RELEASE

Polarion Software Becomes SAP Partner Number 1,000

Polarion for SAP NetWeaver now runs completely on SAP NetWeaver Platform

Stuttgart, Germany, July 4, 2005 — Polarion Software, creators of fully integrated application lifecycle management solutions and services, today announced that it has been certificated by the SAP® Integration and Certification Centre (ICC) as SAP partner number 1,000. The certification indicates the complete, tested integration of the company's Polarion for SAP NetWeaver® software under SAP NetWeaver.

In addition to Polarion for Subversion, a similar system based on Subversion and available since the beginning of this year, the Stuttgart-based software tools manufacturer has delivered this new version based completely on the Design-Time-Repository within SAP NetWeaver. With this release, Polarion guarantees Traceability for all Work Items within a SAP NetWeaver project.

"The big advantage of the Polarion solution is the fact that all project partners work on the same database, namely at the SAP Design-Time Repository," said Polarion CEO Frank Schröder. "With it, it is possible to show the actual status of development in real time. The Dashboard integrated in Polarion for SAP NetWeaver is an ideal monitoring tool to give project managers a detailed overview at any time."

For analysts, designers and developers, the integrated Tracker is the primary working area, covering all essential aspects of change management. Tracker is workflow-oriented and handles everything in the Design-Time-Repository of SAP NetWeaver - stored Requirements, modified applications, and tasks.
