Polarion Software joins Siemens PLM Software Solution Partner Program as a Software and Technology Partner

Partnership Drives Data and Process Integration to Synchronize Development Efforts of Software-, Electrical- and Mechanical Engineers

Stuttgart, Germany/San Francisco, CA – September 30, 2014 - Polarion Software today announced its partnership with Siemens PLM Software focused on integrating Product Lifecycle Management (PLM) technology from Siemens with Polarion's Application Lifecycle Management (ALM) solution. The integration will unlock synergies between software engineers and their mechanical and electrical counterparts through unprecedented data federation, interoperability and bi-directional traceability.

Siemens PLM Software is a leading global provider of PLM software and services, and its Teamcenter® portfolio is the world's most widely used digital lifecycle management software. Polarion Software is the creator of the world's fastest enterprise scale browser-based ALM solution. Using the latest technology and unified by design, Polarion ALM provides traceability and transparency across all software development activities. With embedded software having become one of the most important components in engineered product advancement, the orchestration of both lifecycle management disciplines will enable organizations to accelerate collaboration, integrity and innovation.

"Polarion Software is excited to join Siemens PLM Software's partner community. The strength of our two organizations working together will deliver significant value to our customers," says Stefano Rizzo, Polarion's Senior Vice President Strategy and Business Development. "With embedded software having become the most important component in engineered product innovation, the long-anticipated convergence of software and product development tools will help organizations to finally gain a 360 degree view of their projects' history, status and outlook, taking development efforts to the next level."

"Siemens PLM Software is committed to creating partnerships to help enhance the end-user experience of our customers," said Eric Sterling, Senior Vice President, Lifecycle Collaboration Software, Siemens PLM Software. "We are pleased to work with Polarion Software to provide open, integrated solutions that improve the productivity of our mutual customers. The partnership addresses the pressing need for integration across enterprises in industries including automotive, medical devices, electronic engineering, manufacturing and aerospace, and we look forward to working with Polarion Software to bring value to large, distributed teams and enterprises worldwide."

Edoardo Sivera, System Integration Team Leader, CNH Industrial confirms that "this is great news that we've been hoping for ever since we started using both Teamcenter and Polarion. The integration of software and product development processes will allow us to achieve a much better use of our tools and resources and help our teams bring innovative products to market at a much faster pace."

Press Release

About Polarion Software

Polarion Software is a leading provider of a 100 percent browser-based and unified platform for Requirements, Quality, and Application Lifecycle Management (ALM). The company helps global organizations in a wide range of industries from automotive to medical device and aerospace -- creators of products that people trust – achieve agility, traceability and compliance for their complex products. More than 2.5 million users worldwide rely on Polarion to fuel collaboration; integrate ALM and Product Lifecycle Management (PLM); and more efficiently bring their high-quality products to market.
