

Polarion® ALM for ClearCase®

Fully-integrated Requirements, Change, and Application Lifecycle Management (ALM) for IBM Rational ClearCase

Seamlessly combines the low-cost, easy-to-use Application Lifecycle Management (ALM) solution from Polarion Software with the well-established configuration management system IBM® Rational® ClearCase®

With Polarion ALM for ClearCase companies having well established software development processes based on ClearCase can finally benefit from a modern Web 2.0 application without migrating their data.

What's more, projects using ClearCase and projects using Subversion can live together in a unique web platform providing full ALM capabilities including Requirements Management, Test Case Management, Build Management, Issue Tracking, Wiki and Dashboarding.

KEY BENEFITS

- **Fully-integrated Solution** delivering Requirements, Change, and Application Lifecycle Management.
- **Unprecedented Low TCO** (Total Cost of Ownership), with all the functionality most companies will ever need
- **Seamless integration** with ClearCase
- **Easy to install**, configure, and use on Windows® or Linux

WHY POLARION ALM for ClearCase?

- Full traceability from project inception to code allows full project transparency, perfect change management and realistic impact analysis
- State-of-the-art embedded Requirements Management saves money: no need to buy other product licenses, no dubious integrations to preserve and maintain
- Legendary Polarion usability dramatically lowers training costs too
- Web 2.0 architecture eliminates fat client applications, lowers overall TCO

Top Capabilities & Features

- **Fully-integrated Application Lifecycle Management**
- **Requirements Management**
 - Elicitation and Gathering via Wiki, MS-Word, MS-Excel, Requirements Designer
 - Reuse of Projects and Requirements via Templates
 - Integrated Wiki
 - DOORS Import/Export
- **Test Case Management**
 - Automated test case generation for each requirement
 - Overview of test coverage for Requirements
- **Change Management, Bug Tracking**
 - Bug Tracking with integrated Wiki
 - Workflow driven Change Management
 - Synchronization with Change Packages in ClearCase
- **Planning and Task Management**
 - Time Sheets
 - Multi-project Plane with Timebox Method
- **Workflow-driven Process Management**
 - Fully customizable Workflows (globally and per project)
 - Out-of-the-Box Project Templates for SCRUM, CMMI, Waterfall
- **Reporting and Dashboards**
 - Word, Excel, PDF, XML reports
 - Customizable Project and Multi-project Dashboard

Who should consider Polarion ALM for ClearCase?

Polarion ALM for ClearCase is the perfect solution if you are now using ClearCase and...

- You could benefit from a compelling web based solution for your Bug Tracking and Change Management that synchronizes with the change sets in ClearCase
- You are looking to integrate Requirements Management
- You want full traceability from your Requirements into implementations managed with ClearCase
